

Use **TECHNOLOGY** to **ENGAGE STUDENTS** **SAFELY and SECURELY**

Your students are already using a variety of technology tools to communicate with friends and family outside of the classroom. Now you can bring those same tools—email, online discussions, social networking sites, blogs and more—into classrooms in a safe and secure way with **eChalk**.

* **Enhance the Student Learning Experience**

Your students are already digital natives. eChalk enables you to meet them in their own environment with online class schedules, homework assignments, teacher presentations, relevant video clips and more to maximize learning.

* **Increase Student Accountability**

Did your students miss a class? Lose an assignment? With eChalk, it's easy for students to check their online classroom to view assignments they may have missed. Our Student-Safe Accounts help you create a culture of "no excuses."

* **Prepare Students for the Future**

Whether students choose college or the workplace, they all need technical and online communication experience to succeed. eChalk Student-Safe Accounts allow everyone to develop essential 21st century skills.

* **Involve Parents**

Give parents insight into classroom activities by showcasing student work and their accomplishments. eChalk also allows parents to access student grades in a safe and secure environment.

* **Save Time and Money**

Forget about buying more paper, replacing expensive ink cartridges and distributing hundreds of copies during limited class periods—upload documents to your online eChalk classroom. Assignments and exams are easily added to class calendars and archived for re-use next term. Plus, students can access assignments in a private class environment anytime, from any location.

Go GREEN!

Protect the Earth (and your budget!) by going paperless. Reduce paper consumption and help save the planet one classroom at a time by posting worksheets and study guides all in one place that students can access 24/7.

“...I LOVE eChalk because it gives me a chance to have an email account that is in a safe environment. This is perfect for me!”
— Sarah H., Student

TRUST THAT STUDENTS ARE ALWAYS SAFE & SECURE

EMAIL

Teach students the proper technical and professional use of email. Equip them with this essential 21st century tool in a safe and secure environment that enables them to locate and communicate with teachers, schoolmates and parents.

BLOGS

Engage students with safe blogging tools that help them improve their writing and communication skills. Blogs give students a creative outlet and give teachers an opportunity to showcase great writers. And they give students a place to reflect on their academic progress throughout the year.

DISCUSSION FORUMS

Extend your classroom discussions online. Students become more engaged in a moderated collaborative environment that encourages individual expression and feedback from their peers.

HOMEWORK DROP BOX

Save classroom time and minimize printer usage when students submit completed homework assignments into an online drop box. All assignments are time-stamped, tracked and students even get a confirmation number.

DIGITAL LOCKERS

Give your students a place to store school documents online where they're available 24/7. All of their files are scanned for viruses and they're accessible from any connected computer, anywhere. No pen-drive can do that!
